Sprint 1 Retro Notes
Team: MCASN

Sprint: #1
Date: 10/09/2022

Attended:
Nathan Boc
Mevlut Saluk
Christodoulos Voulismas
Abida Mohammadi
Sankeath Suriya Arachchiralalage

Scrum Master: Mevlut Saluk
Product Owner: Emad Alasadi
Development team:
Nathan Boc
Mevlut Saluk
Christodoulos Voulismas
Abida Mohammadi
Sankeath Suriya Arachchiralalage

1. Things That Went Well

   Task progression, backend development and setup of Flutter and Dart.

2. Things That Could Have Gone Better

   Could have conducted higher quality standups, utilised more of Jira and better organisation and cleaning of the task board - tasks and user soties should be updated more frequently and align with the completed work or new feature requirements.

3. Things That Surprised Us

   Complexity of the microservices architecture.

4. Lessons Learned

   Gained a better understanding of microservices and app development, how to better plan meetings and task requirements, how to better communicate ideas during standups and the importance of catching up all team members on design changes.

5. Final Thoughts

   Things to Keep - Constant communication and updates
   Things to Change - More Jira board interaction and use, more detailed updates between each members work
